

Your Pipeline Snapshot – MVP Spec (Operator-First)

Left Column = Hiring Health (Tiles with Sparklines)

1. Orientation Fill Forecast

- **Copy:** “12 of 15 roles on track (3 at risk)”
- **Tooltip:** “% of roles forecast to fill by orientation (PPP_Match_Target).”
- **Empty State:** “No orientation jobs posted yet — forecasts appear once you add an orientation date.”
- **Thresholds:**
 - Green $\geq 90\%$
 - Amber 80–89%
 - Red $< 80\%$ or orientation < 7 days away
- **Alert:** Banner if orientation < 7 days and forecast $< 90\%$.
- **Interactivity:** Click → modal with trendline (last 30/60/90d) + “See Analytics: Orientation Fill.”

2. Strong Matches

- **Copy:** “86% strong matches this month”
- **Tooltip:** “% of surfaced candidates rated as strong fit + predicted to stay $\geq 30d$.”
- **Empty State:** “No candidates matched yet — updates once your first matches are surfaced.”
- **Thresholds:**
 - Green $\geq 75\%$
 - Amber 60–74%
 - Red $< 60\%$
- **Alert:** None (value itself conveys state).
- **Interactivity:** Click → modal with sparkline + ability to toggle timeframe (7d / 30d).

3. Retention Outcomes

- **Copy:** “72% of hires stayed ≥ 30 d (last 90d)”
- **Tooltip:** “% of new hires who stayed ≥ 30 days (observed vs predicted).”
- **Empty State:** “Shows once your first hire reaches 30 days. Accuracy improves as more hires complete.”
- **Thresholds:**
 - Green $\geq 70\%$
 - Amber 55–69%
 - Red $< 55\%$
- **Alert:** Banner if $< 55\%$ across last 30 hires.
- **Interactivity:** Click $\rightarrow$ modal with retention curve + toggle timeframe.

4. Pulse Trends

- **Copy:** “+34% morale trend (last 30d)”
- **Tooltip:** “Average morale trend from weekly caregiver check-ins.”
- **Empty State:** “Pulse scores show after your first week of staff check-ins.”
- **Thresholds:**
 - Green stable/up ($\geq +5\%$)
 - Amber flat ($\pm 5\%$)
 - Red down $> 10\%$ over 7d
- **Alert:** Banner if morale drops $> 10\%$ in 7d.
- **Interactivity:** Click $\rightarrow$ modal with trendline + filter by floor/shift (if data exists).

Right Column = Workforce Stability (Bars / Now-Scores)

5. Early Churn Risk

- **Copy:** “4 hires at risk ($\sim \$40$ K turnover cost)”

- **Tooltip:** “% of active new hires flagged for early churn risk.”
- **Empty State:** “No recent hires — churn risk shows once new staff are onboarded.”
- **Thresholds:**
 - Green $\leq 10\%$ flagged
 - Amber 11–24%
 - Red $\geq 25\%$
- **Alert:** Banner if $> 25\%$ flagged.
- **Interactivity:** Click $\rightarrow$ modal shows list of flagged hires + drivers.

6. Retention Forecast

- **Copy:** “52% projected to stay 30d”
- **Tooltip:** “% of current hires projected to stay ≥ 30 d (based on RLS).”
- **Empty State:** “Forecast available once at least 3 hires are in their first 30 days.”
- **Thresholds:**
 - Green $\geq 70\%$
 - Amber 60–69%
 - Red $< 60\%$
- **Alert:** Banner if $< 60\%$ forecast.
- **Interactivity:** Click $\rightarrow$ modal with forecast curve + timeframe toggle.

7. Work Environment Score

- **Copy:** “77 / 100”
- **Tooltip:** “Composite score of morale + fit signals (updated weekly).”
- **Empty State:** “Environment score updates once pulse + match data are available.”
- **Thresholds:**
 - Green ≥ 75

- Amber 65–74
 - Red <65
- **Alert:** None.
- **Interactivity:** Click → modal with breakdown by shift/floor.

8. Culture Alignment

- **Copy:** “58% aligned”
- **Tooltip:** “% of recent hires aligned with your facility’s culture profile.”
- **Empty State:** “Shows once 3+ hires complete culture intake.”
- **Thresholds:**
 - Green $\geq 70\%$
 - Amber 60–69%
 - Red <60%
- **Alert:** None (informational).
- **Interactivity:** Click → modal with mismatch breakdown + suggestions.

9. ROI Summary (Badge Card)

- **Copy:** “\$24K saved, 200 hrs time saved, 6 hires retained”
- **Tooltip:** “ROI from reduced turnover + faster fills (export full report).”
- **Empty State:** “ROI shows as soon as your first hire completes. Accuracy improves as more hires flow in.”
- **Thresholds:**
 - Neutral \$0–10K
 - Green >\$10K this month
- **Alert:** Badge highlights green when >\$10K.
- **Interactivity:** Click → modal preview + “Download ROI Report (PDF).”

Scope Notes

- **Clickable modals** are MVP — not scope creep. This is standard SaaS dashboard behavior (tile → modal → analytics).
- **Advanced filtering (role/floor/shift across all tiles)** lives in **Full Analytics**, not Snapshot. Snapshot modals only show: *trendline* + *timeframe toggle*.
